

## Welcome...

On behalf of the staff, patients and community, to New Life Lodge.

We recognize the difficulty in entering treatment for substance abuse and admire your tenacity and courage. For more than 20 years, New Life Lodge has offered the best possible treatment and services for people who struggle with alcohol, cocaine, prescription pills and other major drug addictions. These 20 years have been filled with many accomplishments and our work has become synonymous with distinction.

We believe that successful treatment for chemical dependency and recovery is based in the immersion in a 12-Step program, combined with spiritual guidance, and counseling overseen by a professional and empathic team.

Providing an opportunity for recovery is an important part of the mission of New Life Lodge. Today, that mission remains unchanged. We promise our staff, patients and their families that our programs will offer the highest level of care and continue to be exceptional.

New Life Lodge invites visitors looking for additional information about our specialized programs and services to call us or visit our website at [www.newlifelodge.com](http://www.newlifelodge.com). Returning alumni can also access the website regularly to stay informed of upcoming events, and aftercare meetings.

Looking to the future, New Life Lodge remains committed to our patients and their families, and the creation of a unique, empowering environment where the process of change and recovery can occur.

Sincerely,

Billy Young  
Executive Director
